# BUSHEL OF PROOF.

Check out the real results of SUL4R-PLUS.

## 2018 CORN TRIAL RESULTS HARDIN COUNTY, KENTUCKY : YIELD BU/ACRE @ 15.5% MOISTURE

## 2018 SOYBEAN TRIAL RESULTS NORTHEAST INDIANA : YIELD BU/ACRE

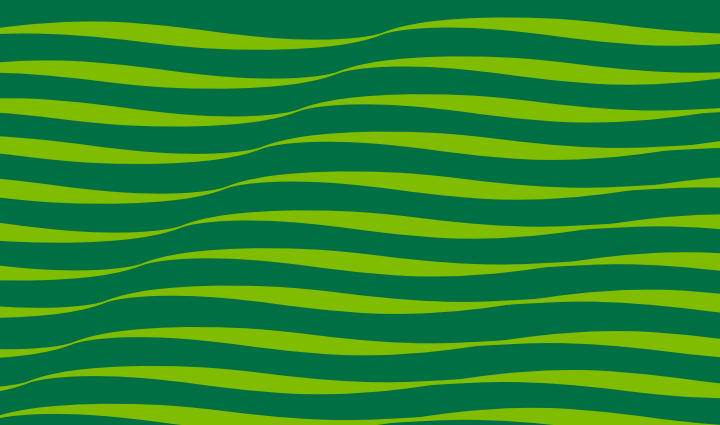

# OUR PATENTED ADVANTAGES.

**SUL4R-PLUS granular calcium-sulfate is unlike anything on the market.**

Our specialized fertilizer makes your job easy in any environment. It boosts yields by providing plant-available nutrition when the crops need it. Plus it improves the overall health of your soil.

## **SUL4R-PLUS ADVANTAGES:**

- Plant Safe and Immediately Available Nutrition (Calcium, Sulfate, with Options for Boron and Zinc)
  - Quality and Consistency
  - Long Lasting - Gradual Release
  - Dust-Free Handling and Storage
  - Fulvic Acid Binder (~ 8%) that Improves Overall Soil Health
- 

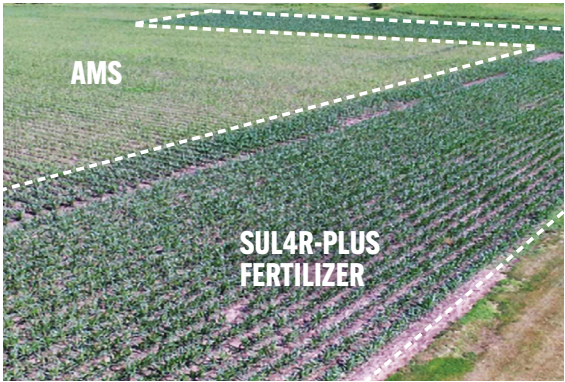

# FASTER AND LONGER LASTING NUTRITION.

## SUL4R-PLUS outperforms AMS across the board.

SUL4R-PLUS has a Salt Index of 5, compared to 88.3 for AMS. The higher the Salt Index, the more that water in the soil is restricted from the seed or plant—and the longer it takes to be plant-safe. SUL4R-PLUS brings immediately available nutrition to your plants.

And it's not just fast—it lasts. Our patented fertilizer maintains nutrient value for over 60 days, while AMS loses all value between day 5 and day 10.

Key Comparisons	SUL4R-PLUS® fertilizer	AMS
Immediately Available to Your Plants	✓	X
Soil Stable for Over 60 Days	✓	X
Low Salt Content	✓	X
Low Leaching Risk	✓	X
Best Modern Source of Sulfur for All Crops	✓	X
No Unneeded Nitrogen to Soybeans	✓	X
Lowest Cost Per Day Sulfur Source	✓	X

In a trial, the darker and taller corn had SUL4R-PLUS applied, while the lighter and shorter corn had AMS applied, which leached out.

SUL4R-PLUS fertilizer delivered 10+ bu/acre with 1-2 point improvement on test weight on wheat in Illinois.

Note the smaller ear size and tip-back on corn grown with Check compared to corn grown with SUL4R-PLUS B+Z.

# Thinking of ordering?
